## **DRAKE COLLECTIBLES ANNOUNCES THE RELEASE OF TWO NEW KENWORTH "C" SERIES BIG BANGERS!!!**

September 02, 2016

Brisbane, Queensland, Australia - Drake Trailers have the pleasure in announcing today the release of 2 new Kenworth C series 1:50 scale "Big Bangers"

Z01395 Doolan; but this time it's the Road Train Division! Doolan is one of the most popular Australian scale model heavy haulage liveries. In preparation for the release of the Australian spec road trains later this year we have produced a dedicated truck to sit up front to pull the rig. This release bares similar resemblance to the previously Z01392 Doolan Heavy Haulage truck (sold out) but has a few unique features such as upgraded graphics, round fuel tanks, Texas style front bumper & rubber mud guards.

Z01396 McAleese "BRUTE"; The aptly name C501 Brute was the pinnacle of Kenworth heavy trucks designed to tame the toughest conditions down-under. This big banger is based on a truck that operates from the Victorian branch of McAleese in Australia and has a long history in Australian heavy haulage. Like the Doolan road train truck this new model also bares similar resemblance to the previously Z01381 McAleese Transport C509 (also sold out). This model also has a few additional unique features such as upgraded graphics, round fuel tanks & heavy haulage style rubber mud guards and will look great sitting in front of a Drake 12x8 steerable platform.

Production quantities of each livery is 200 units for worldwide distribution.

Packed with all the award winning feature these models are a must for the green and blue collectors....
